NEHW QUIZ

August 16, 2018

Hawk Migration Reports

5. Which NorthEast watch site recorded a Zone-tailed Hawk on Sep 20 2015? Answer: <http://www.battaly.com/nehw/reports/NEHW2015.pdf> page 12,26

6. Hawk watchers in the NorthEast know that Broad-winged Hawks are the single most prevalent species counted for both spring and fall seasons. The 2nd ranked species during Spring Migration has varied among three species (listed alphabetically): American Kestrel, Sharp-shinned Hawk, and Turkey Vulture.

Which two of these three species are approaching approximately the same Spring count of 100 hawks/100 hours? (Bonus: Which of the 2 species is increasing?)

Answer: See *NEHW 2017 Hawk Migration Reports* page 6

or: <http://www.battaly.com/nehw/reports/NEHW2015.pdf> page 6

7. Both Montclair NJ and Pilgrim Heights MA counted a Mississippi Kite in the 2017 Spring migration season. Which of these two sites also counted a Swallow-tailed Kite? Answer: See *NEHW 2017 Hawk Migration Reports* page 3

Note: While older issues of the *NEHW Hawk Migration Reports* are posted on-line, the current issue is not. Your \$10 membership will support our *Report* and our mission of raptor conservation.
